

Alejandro Sánchez Yalí

Senior Full Stack Engineer

✉ asanchezyali@gmail.com | **in** [asanchezyali](#) | [asanchezyali](#) | [asanchezyali.com](#)

SUMMARY

Senior Full Stack Engineer with 8+ years building and maintaining scalable web applications in Python and TypeScript. Three years on a distributed team across Canada, the US and Latin America leading frontend architecture, reviewing code and mentoring engineers, followed by two years as an independent consultant designing systems for clients and building three products end to end. M.Sc. in Mathematics. Strong bias toward clean architecture, testing, and decisions that survive their second year.

TECHNICAL SKILLS

- **Languages:** Python (8+ years), TypeScript (6+ years), JavaScript (6+ years), SQL
- **Backend:** Django, Django REST Framework, FastAPI, Flask, Node.js, Express, NestJS, RESTful APIs, GraphQL, microservices
- **Frontend:** React.js (7+ years), Next.js (6+ years), Tailwind CSS, Shadcn UI, Redux, Zustand, Zod, SASS
- **Databases:** PostgreSQL, MongoDB, MySQL, Redis, Firebase
- **Cloud & DevOps:** AWS, GCP, Docker, GitHub Actions, CI/CD pipelines
- **Engineering:** Clean architecture, DDD, SOLID, DRY, TDD, Vitest, Jest, React Testing Library, code review, mentoring

EXPERIENCE

- | | |
|---|--|
| Full Stack Engineer
<i>Monadical</i> | Apr 2021 – Aug 2024
<i>Remote, Canada/US</i> |
| <ul style="list-style-type: none">– Participated in system design and architectural decision-making for new features and services, evaluating trade-offs across performance, scalability and maintainability– Built and maintained full stack applications in Python (Django, FastAPI) and TypeScript (React.js, Next.js), with RESTful and GraphQL APIs– Led frontend architecture, reusable component libraries and advanced testing strategy (Vitest, Jest, TDD)– Designed ETL pipelines and custom Django ORM extensions; managed deployments on AWS and GCP with Docker and CI/CD– Led code reviews and mentored team members across a distributed team in three countries | |
| Independent Software & AI Consultant
<i>Freelance</i> | Aug 2024 – Present
<i>Remote</i> |
| <ul style="list-style-type: none">– Designed and delivered three products end to end, owning architecture, backend, frontend and deploy for each– Designed the database architecture for a client's workflow automation platform in an NX multi-repo, and served as code reviewer for their team– Led technical design sessions with clients, translating business requirements into system architectures– Refactored legacy codebases and implemented practices for scalability and security; mentored junior engineers | |
| AI Specialist
<i>Lapzo</i> | Aug 2025 – Sep 2026
<i>Remote, Mexico</i> |
| <ul style="list-style-type: none">– Made the key architectural decisions for an educational platform, designing the integration between services and the real-time communication layer– Implemented real-time features with Next.js, NestJS and Firebase Realtime Database | |
| Full Stack Engineer
<i>BCFort</i> | Aug 2018 – Oct 2020
<i>Medellín, Colombia</i> |
| <ul style="list-style-type: none">– Designed system architecture for blockchain and analytics platforms: data models, service boundaries and smart contract patterns– Built platforms with Python (Django), Node.js, React and Web3.js; managed infrastructure on AWS, GCP and IBM Cloud | |

- Taught Machine Learning, Data Science and Mathematics with Python and the scientific stack
- Developed curriculum for programming, mathematics and ML, and mentored student research projects

FEATURED PROJECTS

- **VitaStock – Surgical Supply Chain for Clinics**  – *Python, FastAPI, Next.js, TypeScript, PostgreSQL, Docker, Railway*
 - Sole architect and engineer of a platform commissioned by a private surgical clinic in Colombia – 12 modules and 5 user roles designed to replace spreadsheet-based inventory and procurement
 - Surgery scheduling with supply baskets and real-time consumption tracking, lot-level traceability with expiry alerts, and true per-patient cost through a cardex
- **Plixiq – AI Customer Support on WhatsApp**  – *Python, FastAPI, LiteLLM, PostgreSQL, Next.js, Railway*
 - Took the product from an idea to a deployed system alone: discovery, architecture, backend, frontend and deploy
 - About 40,000 lines to a near-complete MVP in 4 months part-time, running at \$60–80/month because cost scales with LLM usage rather than infrastructure
- **Digital Human – Interactive AI Avatar**  – *React, Three.js, React Three Fiber, OpenAI GPT, Whisper, ElevenLabs*
 - Open-source conversational avatar with 464 stars and 110 forks: real-time speech-to-text, generation, voice synthesis and lip synchronisation
 - The engineering problem was latency budgeting across four services, since a human notices any pause in a conversation

OPEN SOURCE

- **talking-avatar-with-ai**  – 464 stars, 110 forks. Open-source conversational AI avatar: OpenAI GPT, Whisper, ElevenLabs, Rhubarb lip-sync, Three.js
- **Monadical-SAS/Morpheus**  – 19 pull requests. Open-source AI image generation platform: FastAPI, React, Stable Diffusion
- 493 GitHub stars across own open-source projects – top 4.8% of ranked GitHub profiles (GitRanks)

TALKS & WRITING

- **Scaling Learning Models: Parallelism Strategies in JAX with Flax**  – PyCon Colombia, 2024

EDUCATION

M.Sc. in Mathematics
Universidad de Antioquia

Aug 2010 - Sep 2013
Medellín, Colombia

B.Sc. in Teaching Mathematics and Physics
Universidad de Antioquia

Jan 2004 - Oct 2009
Medellín, Colombia
