

Alejandro Sánchez Yalí

Product Engineer

✉ asanchezyali@gmail.com | [in asanchezyali](#) | [🔗 asanchezyali](#) | [🌐 asanchezyali.com](#)

SUMMARY

Product Engineer who takes products from an idea to a deployed system. In the last two years led three complete products – Plixiq (AI customer support on WhatsApp), Aluna (AI-assisted recruitment) and VitaStock (surgical supply chain for private clinics) – owning discovery with users, architecture, backend, frontend and deploy. 8+ years of engineering, an M.Sc. in Mathematics and 11 years teaching, which is why the hardest parts of the job – explaining a system and deciding what not to build – come naturally.

TECHNICAL SKILLS

- **Ship the whole thing:** Python, FastAPI, Django, Celery, TypeScript, Next.js, React, Node.js, NestJS, Rust (Axum), PostgreSQL, Redis, Docker, Railway, AWS
- **AI in products:** LLMs, LangChain, LangGraph, LiteLLM, RAG, MCP, OpenAI API, Whisper, ElevenLabs, WhatsApp Cloud API
- **Decide well:** Clean architecture, DDD, SOLID, modular monolith, event-driven design, trade-off analysis, technical design sessions
- **Keep it alive:** GitHub Actions, CI/CD, Docker, background jobs, real-time dashboards, TDD, Vitest, Jest, code review

PRODUCTS SHIPPED

- **Plixiq – AI Customer Support on WhatsApp** [🔗](#) – *Python, FastAPI, LiteLLM, PostgreSQL, Next.js, Railway*
 - Took the product from an idea to a deployed system as architect and lead engineer: discovery, architecture, backend, frontend and deploy
 - Near-complete MVP in 4 months part-time, covered by about 590 backend tests and CI on every pull request; infrastructure runs at \$60–80/month because cost scales with LLM usage
- **Aluna – AI Recruitment Platform for Staffing Agencies** [🔗](#) – *Next.js 15, FastAPI, LiteLLM, PostgreSQL, Inngest, Claude, Gemini, WhatsApp Cloud API*
 - Lead engineer of an AI recruitment platform for staffing agencies, built in 3 months: CVs are scored automatically, an agent interviews candidates over WhatsApp or web chat, and the recruiter gets a shortlist and a client-ready report
 - Deliberate model routing through LiteLLM (Gemini to read documents, Claude to converse), multi-tenant roles from a single policy source, and Ley 1581/2012 consent, deletion receipts and audit logs built into the data model
- **VitaStock – Surgical Supply Chain for Clinics** [🔗](#) – *Python, FastAPI, Next.js, TypeScript, PostgreSQL, Docker, Railway*
 - Architect and lead engineer of a platform commissioned by a private surgical clinic in Colombia – 12 modules and 5 user roles designed to replace spreadsheet-based inventory and procurement; delivered, with rollout at the clinic pending
 - Surgery scheduling with supply baskets and real-time consumption tracking, lot-level traceability with expiry alerts, and true per-patient cost through a cardex

EXPERIENCE

Independent AI Consultant (part-time until Sep 2026)

Freelance

Jun 2026 – Present

Remote

- Lead engineer of Aluna, an AI recruitment platform for staffing agencies (see below)
- Lead engineer of an AI coaching agent that CREARIA delivers to one of its clients
- Use Claude Code daily on live client projects, reviewing every generated change like a pull request before it ships

AI Specialist

Lapzo

Aug 2025 – Sep 2026

Remote, Mexico

- Designed and built a Digital Professor that converses with learners in real time and teaches through interactive slides

- Made the key architectural calls: which LLM orchestration stack, how voice synthesis plugs into the conversation, where the service boundaries go

Independent Software & AI Consultant
Freelance

Aug 2024 – Jul 2025
Remote

- Lead engineer of a multi-tenant AI customer service agent for CREARIA (Colombia) on WhatsApp Cloud API, LiteLLM, RAG and MCP, with automatic human escalation
- Ran technical design sessions with clients, turning vague business problems into architectures and naming the trade-off behind every technology choice
- Code reviewer for a client's development team and architect of their workflow automation platform's database design

Full Stack Engineer
Monadical

Apr 2021 – Aug 2024
Remote, Canada/US

- Three years on a distributed team across Canada, the US and Latin America, shipping full stack products in Python and TypeScript
- Full-stack engineer on ZoHuddle, a video conferencing app for scientific conferences (Neuromatch) that matches participants by mutual interests: React front end and Django back end, with Django Channels (WebSockets) and Twilio Video
- Developed both frontend and backend, with tests; did code reviews

Full Stack Engineer
BCFort

Aug 2018 – Oct 2020
Medellín, Colombia

- Designed system architecture for blockchain and analytics platforms, from smart contract patterns to service boundaries
- Built decentralised applications and NFT marketplaces with React, Web3.js, Ethereum and Hyperledger

Professor of Mathematics & Physics (part-time)
Universidad de Antioquia

Jan 2010 – Oct 2021
Medellín, Colombia

- Eleven years teaching mathematics and physics, the last year and a half also machine learning, and building the AI/ML elective curriculum for the Mathematics Institute
- Mentored student research projects – the same work that later became code review and design docs

OPEN SOURCE

- [talking-avatar-with-ai](#)  – 464 stars, 110 forks. Open-source conversational AI avatar: OpenAI GPT, Whisper, ElevenLabs, Rhubarb lip-sync, Three.js
- [Monadical-SAS/Morpheus](#)  – 19 pull requests. Open-source AI image generation platform: FastAPI, React, Stable Diffusion
- [kipux](#)  – Collaborative-finance app in Rust (Axum, sqlx, PostgreSQL, HTMX, SSE, PWA) with Claude-vision receipt parsing. Open source (MIT), work in progress

TALKS & WRITING

- [Scaling Learning Models: Parallelism Strategies in JAX with Flax](#)  – PyCon Colombia, 2024
- [Building Plixiq: a Multi-Tenant WhatsApp AI Support Platform](#) – architecture case study (2026)
- [Revolutionizing Animation: Building Digital Humans with LLMs](#) (2024)

EDUCATION

M.Sc. in Mathematics
Universidad de Antioquia

Aug 2010 - Sep 2013
Medellín, Colombia

B.Sc. in Teaching Mathematics and Physics
Universidad de Antioquia

Jan 2004 - Oct 2009
Medellín, Colombia
